

MDGuidelines® MEDICAL CODES

MDGuidelines provides health information searchable by International Classification of Disease (ICD) codes focused on:

Working-age people

More than just symptoms alone

Significant incidence or prevalence

We cover a wide variety of billable ICD-10-CM codes to support diagnostic and procedure-specific care.

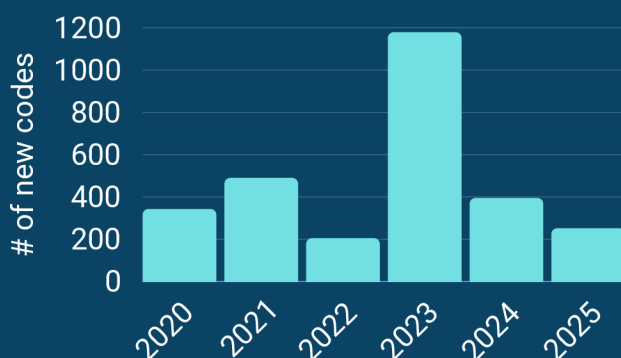

- 600+** Mental health conditions (F codes)
- 5,200+** Musculoskeletal conditions (M codes)
- 30,000+** Injuries & poisonings (S-T codes)
- 1,300+** Cancers (C-D49 codes)
- 700+** Skin conditions (L codes)

MDGuidelines does not use external causes of morbidity (V-Y codes) or health status (Z codes) as they not common reasons for disability, such as:

W59.21 “bitten by turtle”

Y93.D “activities involving arts & handcrafts”

Z62.891 “sibling rivalry”

Each year, new codes are added, revised, or deleted to keep up with new knowledge.
